Professional Summary

Seasoned Engineer with over 15 years of experience in building and leading high-performing teams to deliver scalable, production-ready data solutions. Proficient in designing data pipelines, cloud-based architectures, and utilising modern data integration tools such as Snowflake, Databricks, and Fivetran.

Core Competencies

Technical Expertise:

Data Pipeline Development, ETL Frameworks, Databricks, Airbyte, Snowflake, Fivetran, Apache Kafka, Terraform, Ansible, Python, Scala, DBT Core / Cloud,

Data Platforms:

Data Lakes, Relational Databases, NoSQL, Snowflake, Databricks, BigQuery

Cloud Expertise:

AWS, GCP, Kubernetes, Docker, Infrastructure as Code, Configuration Management, Datadog

BI and Analytics:

SQL, Looker, Sigma Computing, Data Modeling, Data Governance, Data Quality Assurance

Leadership:

Team Mentorship, Agile Methodologies, Cross-Functional Collaboration, Strategic Planning, Technical Debt Management

Professional Experience

Senior Data Architect

Entra Solutions Pvt Ltd (A Subsidiary of BSI Financial)

June 2023 – Present

• Data Architecture and Design

- Designed and implemented scalable data pipelines on Databricks using PySpark, and Scala.
- Design database for OLTP applications on SQLServer and Postgres
- Modeled datasets with DBT (Kimball modelling) to create reusable data marts for analytics and machine learning applications.
- Developed a DSL to allow transformations to be written in EXCEL using a DSL and convert that into PySpark.
- Administration of Roles and Permissions on Databricks / Snowflake thru terraform.
- Designed a solution to reverse ETL several billion records of data in hierarchy into SQLServer from Databricks
- Designed observability for all data pipelines in Databricks.
- Developed dashboard on Sigma Computing giving business the insights that they need.

• ETL and Data Pipelines

- Built and optimized ETL processes to ensure efficient data ingestion, transformation, and storage.
- Utilized DLTHUB and Fivetran for robust data integration from diverse sources.

• Data Governance and Quality

- Developed data governance initiatives to maintain data integrity, consistency, and accuracy.
- Implemented observability solutions and column-level lineage across entire data sets.

• Leadership and Collaboration

- Acted as a player-coach, balancing technical responsibilities with team leadership.
- Collaborated with cross-functional teams to align data infrastructure with business goals.

• Key Achievements

- Delivered a resource optimization solution for Five9 Call Center operations via a new data mart.
- Replaced a high-cost vendor document management solution with a cost-effective in-house system.

- Did database design and data modelling and dashboards for a AI Chatbot application.
- Did data modelling for tracking inaccuracies in Mortgage servicing and highlight it for operations team to fix it under the defined timeline.
- Designed pipelines to automate the loading / transformation and Onboarding of Data tapes from FNMA Box.com

Tech Stack: AWS, Databricks, Clover DX, Python, Pyspark, Scala, Java, Databricks, Snowflake, DBT, DLTHUB, Postgres, SQLServer, s3, ec2, lambda

Data Reliability EM

Shopify

April 2022 – June 2023

- **Infrastructure Management:**
 - Managed the infrastructure that runs Airflow and data pipelines on Google Kubernetes Engine
 - Implemented best practices for infrastructure as code using Terraform
 - Troubleshooting issues with clusters that lead to unhealthy datasets.
- **Cost Reduction**
 - Reduced storage costs in GCS leading to reduction by 30%
- **Technical Debt Management:**
 - Proactively managed and mitigated technical debt to ensure system stability and scalability.

Tech Stack: Java, Python, Terraform, GCP, GCS, GKE, Airflow, Trino, MySQL

Engineering Manager

Fivetran

October 2018 – March 2022

- **Technical Leadership:**
 - Built scalable connectors using Java for various SaaS data sources (e.g., Salesforce, Stripe, Shopify, Netsuite).
 - Designed robust ETL systems, reducing sync times and ensuring data correctness using tools like Airbyte and Fivetran.
 - Designed logging solution around Fivetran product to send logs to various destinations selected by customers.
 - Reduced log ingestion costs in BigQuery by a factor of 80%.
 - Developed feature to pro
- **Team Leadership:**
 - Led multiple engineering teams to design and build resilient data pipelines for ecommerce and CRM data sources.
 - Implemented agile methodologies, improving developer productivity and reducing development time.
- **Key Achievements:**
 - Introduced a backward sync process, reducing data availability time by weeks.
 - Decreased system errors by 40% through best coding and deployment practices.

Tech Stack: Java, GCP, GCS, AWS, DynamoDB, Snowflake, BigQuery, Databricks, Redshift, S3, GKE, EC2, MySQL, Postgres

Principal Member Technical Staff

Oracle

June 2013 – October 2018

- Designed and optimized REST Adapters for SOA Suite, enhancing authentication and performance.
- Transitioned build processes from ANT to Maven, improving build efficiency.
- Led performance optimizations for JMS Adapters and managed changes to the Enterprise Delivery Network (EDN).

Tech Stack: Java, J2ee, EJB, Oracle

Tech Lead

Thomson Reuters Pvt Ltd

June 2009 – May 2013

- Built and maintained the Novus indexing solution for Boolean Search, handling several Petabytes of data.
- Mentored a team of 8 engineers, fostering skill development and high performance.
- Developed the Rotary index for wildcard searches, enhancing search capabilities.

Tech Stack: Java, Oracle

Tech Lead

Wipro Technologies

July 2005 – January 2009

- Designed and implemented web-based solutions for Novartis Pharmaceuticals, including Course Tracking and People Search Applications.
- Developed IMAGE, a solution to track expenditure of Novartis associates towards healthcare professionals.

Tech Stack: Java, Struts, Javascript, Oracle DB

Associate Software Engineer

Skytech Solutions Pvt Ltd

August 2003 – July 2005

- Developed and implemented J2EE applications for United Airlines Cargo, supporting cargo tracking, booking, and reporting.

Education

- **Master of Technology in Computer Science** *BITS Pilani | 2015*
- **Bachelor of Technology in Computer Science** *Sikkim Manipal University | 2003*

Technical Skills

- **Programming Languages:** Java, J2EE, Python, PySpark, Scala
- **Data Technologies:** Snowflake, Databricks, Airbyte, Fivetran, DBT (Data Build Tool), Apache Kafka
- **Cloud Platforms:** AWS, GCP
- **DevOps Tools:** Docker, Kubernetes, Terraform, Ansible, Datadog
- **Databases:** Oracle, SQL, MySQL, Postgres, NoSQL
- **BI Tools:** Looker, PowerBI
- **Other Technologies:** Microservices, RESTful APIs, WebLogic, Tomcat, Agile, Scrum

Management Skills

- Project Management, Team Leadership, Strategic Planning, Cross-Functional Collaboration, Technical Debt Management

Soft Skills

- Strong Communication, Problem-Solving, Decision-Making, Interpersonal Skills, Adaptability
